## **Koi Health and Welfare**

### **Requirements for Healthy Koi**

Healthy Koi do not occur naturally in an artificial environment but result from painstaking planning, good husbandry and considerable effort put in by the Koi Keeper. To achieve this, you require:

- **Good Pond and Filtration design**
- **Good Circulation, Aeration and Temperature Control**
- **Excellent Water Quality Management**
- **Good Maintenance Plan**
- **Careful Feeding based on Water Temperature**
- **Quarantine New Stock and Infectious Koi**
- **Observation and Awareness by the Koi Keeper**
- **Have the Necessary Equipment for BASIC HEALTH CARE**
